Make Changes

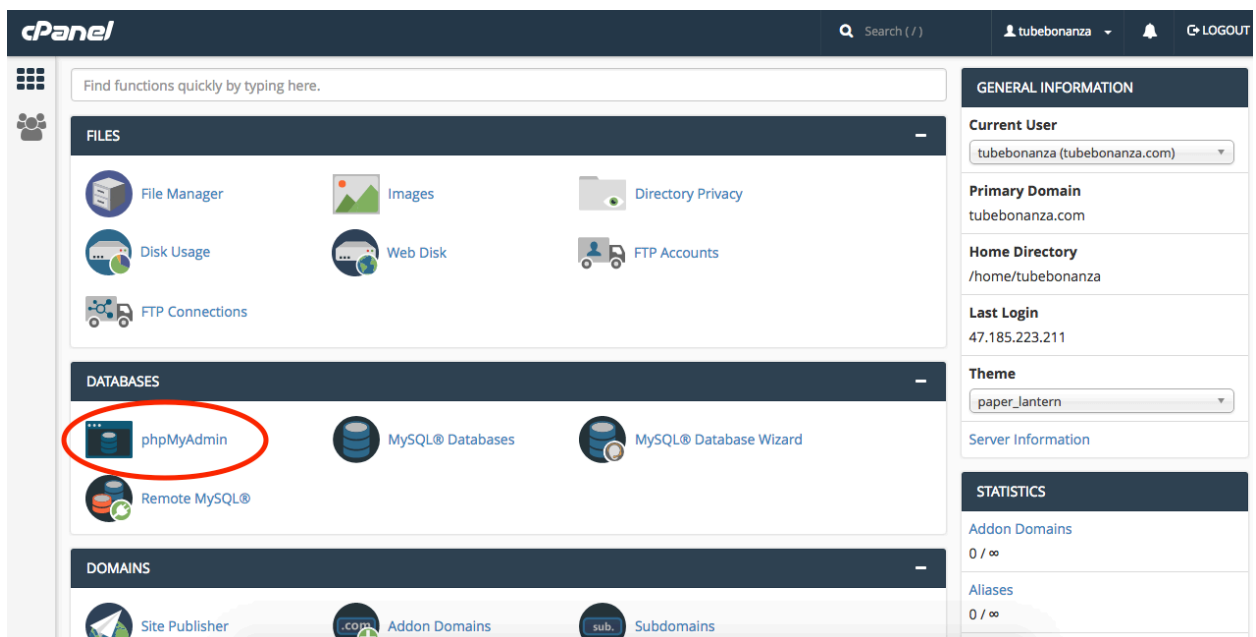

Reset

[Go Back](#)

Step 3: Go to home page on cpanel

Step 4: Go to phpMyAdmin

Step 5: Click on your database

Step 6: Select Import on the top toolbar

Step 7: Upload the d3m0231_fb1234.sql file and press GO at the bottom of the page

File to import:

File may be compressed (gzip, bzip2, zip) or uncompressed.

A compressed file's name must end in **[format] [compression]**. Example: **.sql.zip**

Browse your computer: No file chosen (Max: 55MiB)

You may also drag and drop a file on any page

Character set of the file:

Format-specific options:

SQL compatibility mode:

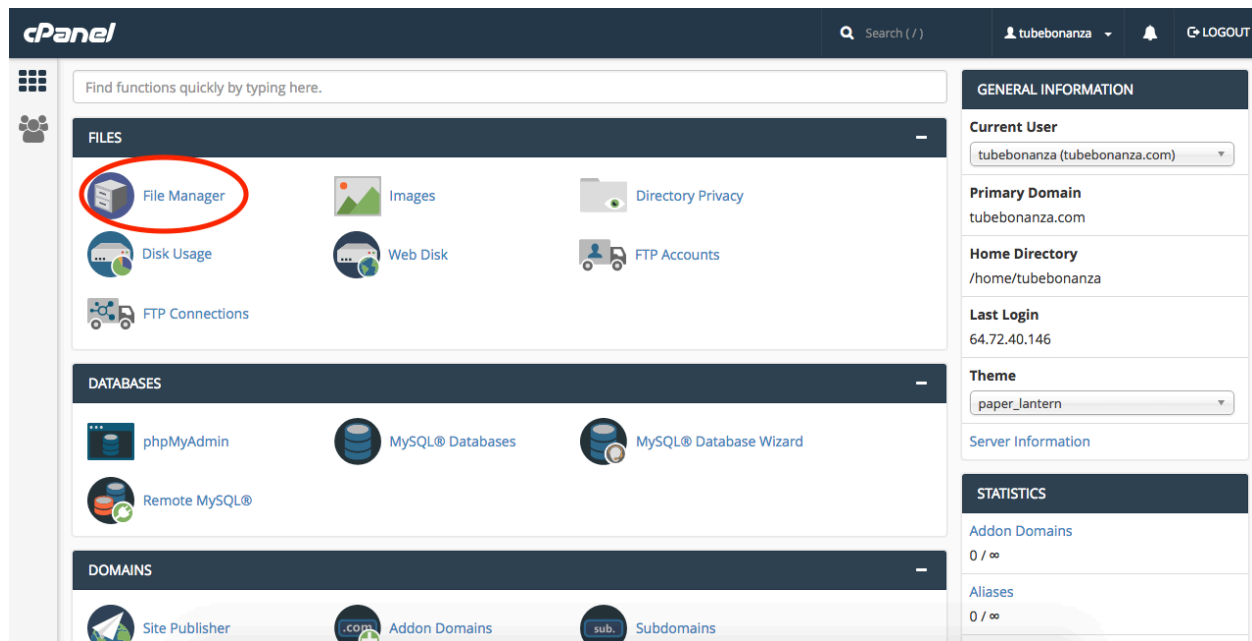

☒ Do not use **AUTO_INCREMENT** for zero values

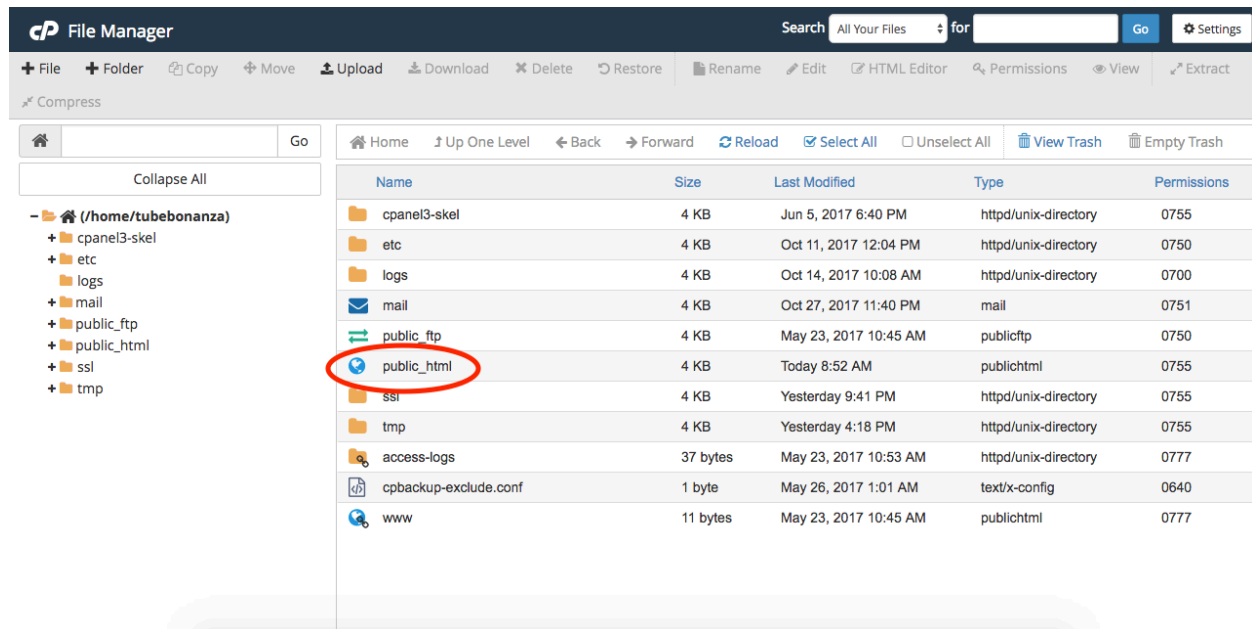

Step 8: Wait for the upload to be complete

Step 9: Go back to your cPanel home page

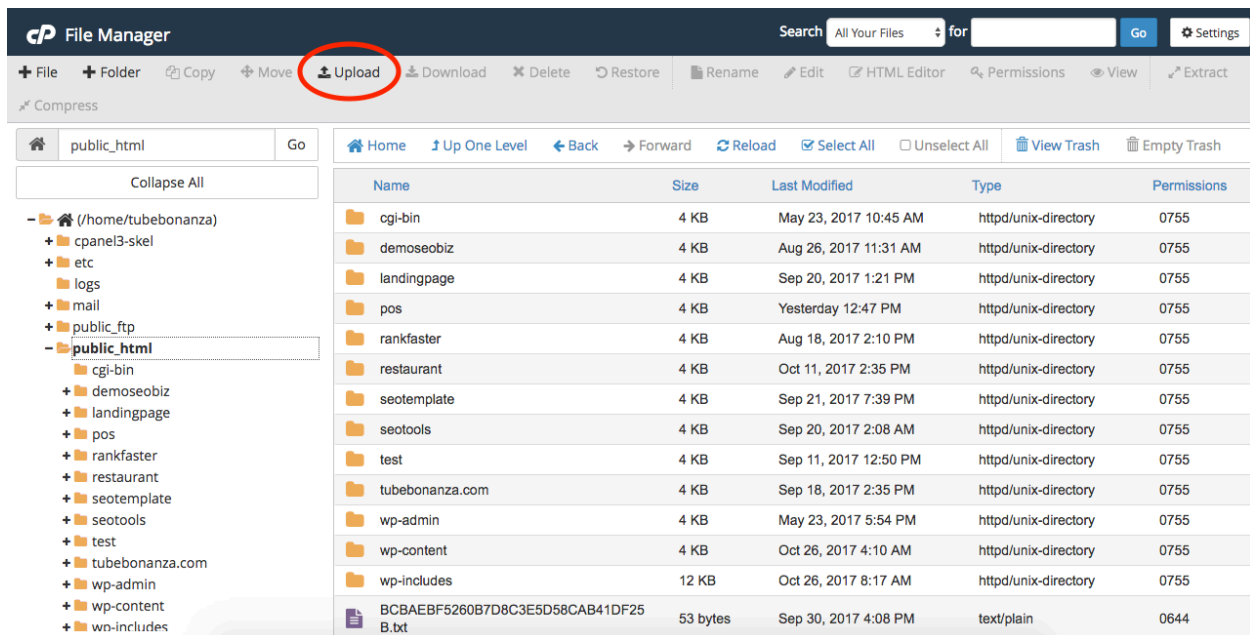

Step 10: Click on File Manager (this should open on a new tab)

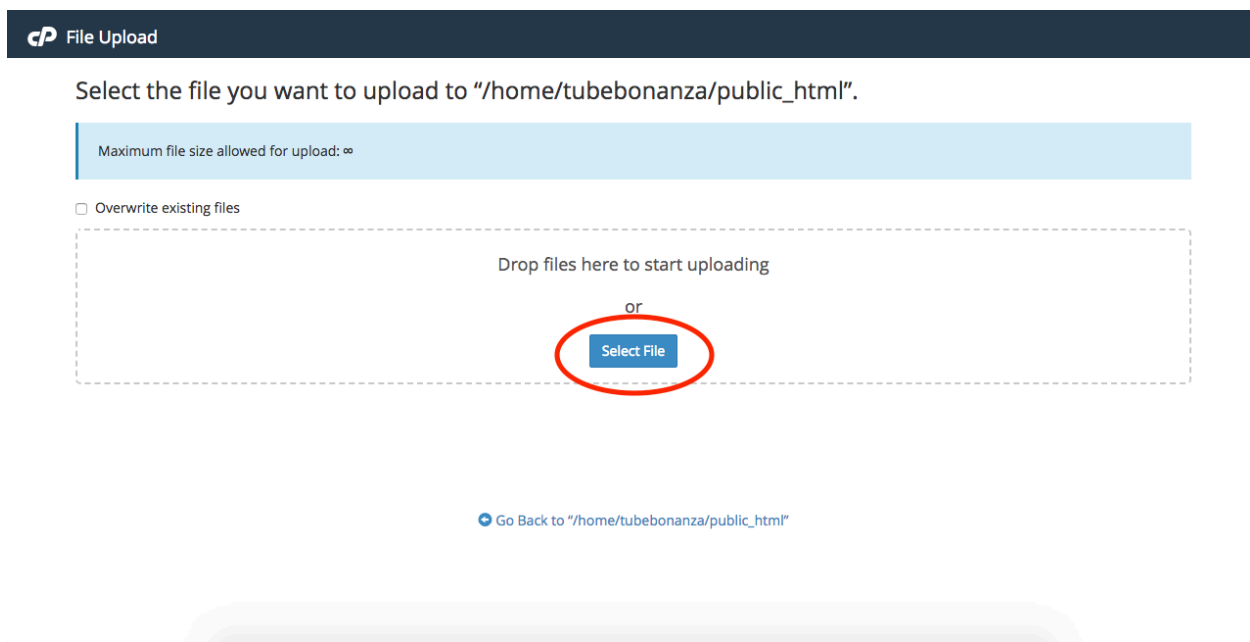

Step 11: Click on public_html

Step 12: Click Upload (it will open to a new tab)

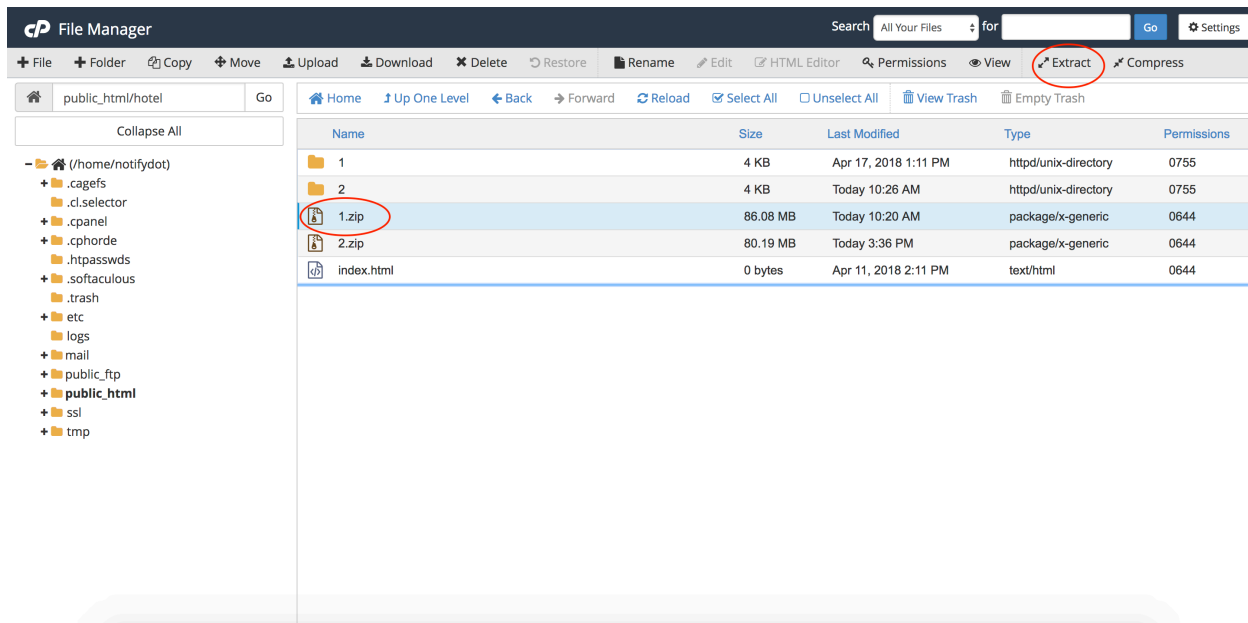

Step 13: Click Select File

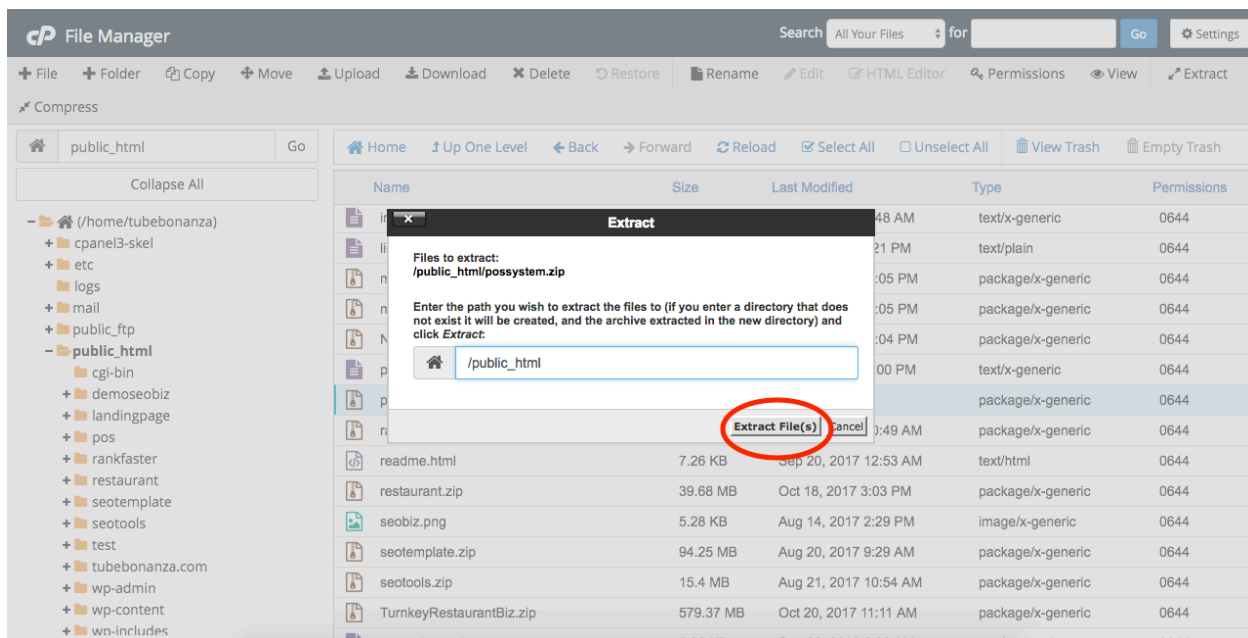

Step 14: Select officevisitorx.zip and click upload

Step 15: Once it has uploaded 100% click Go Back at the bottom of the page

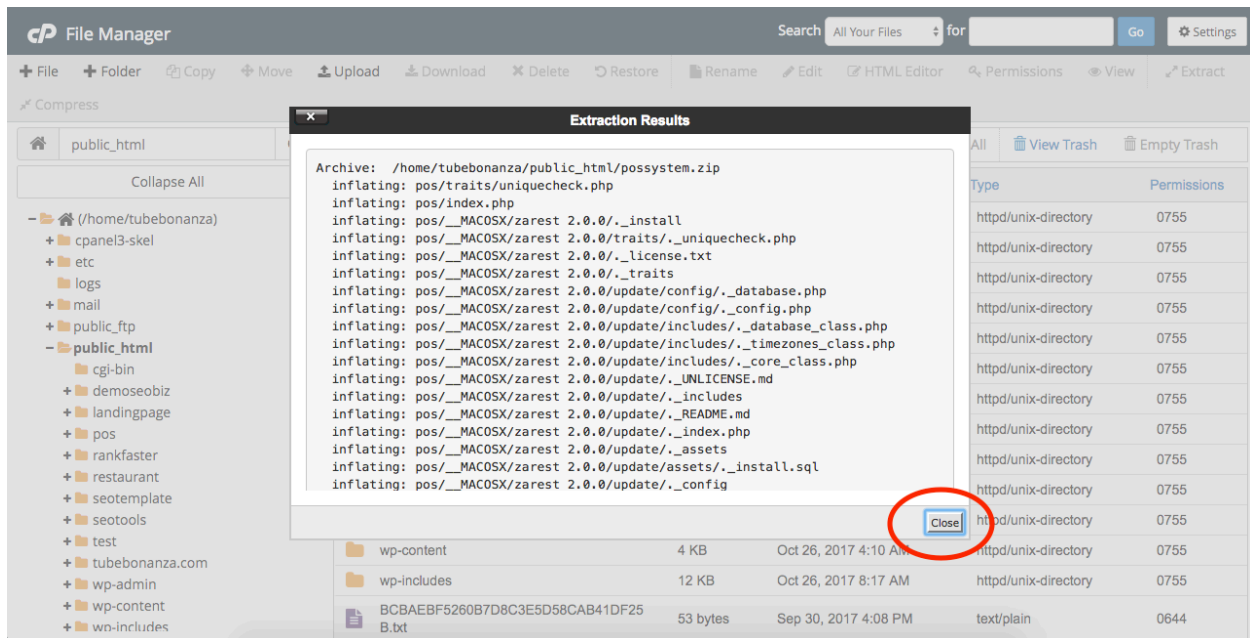

Step 16: Click on zip and click Extract

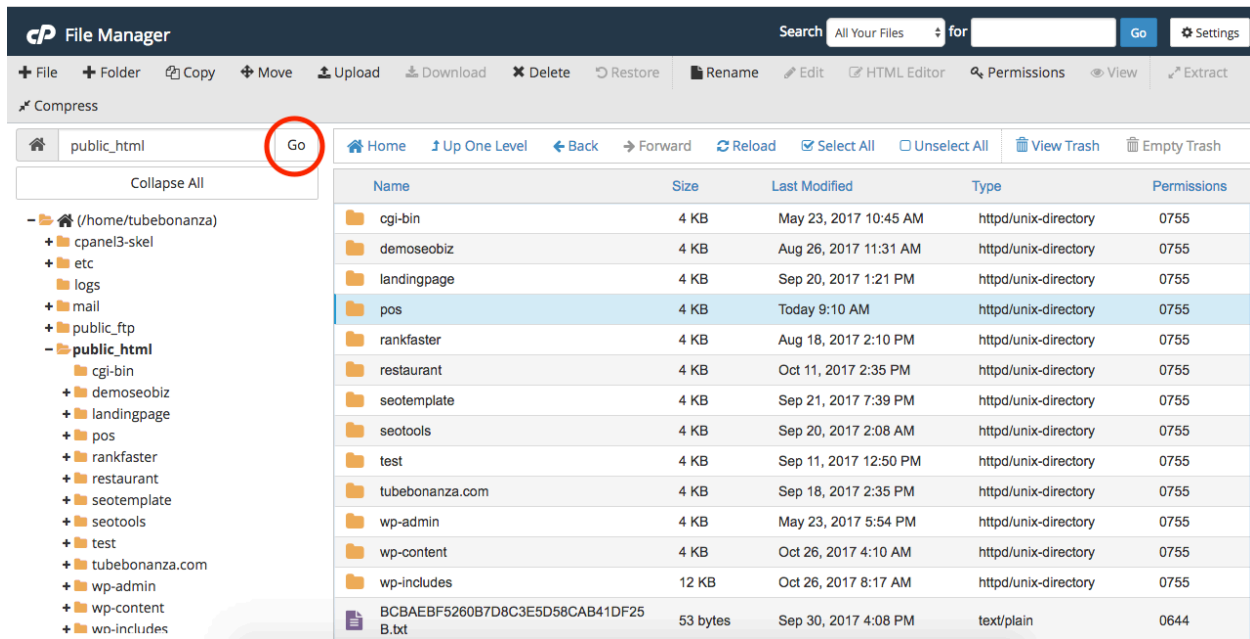

Step 17: This screen will pop up (click Extract Files)

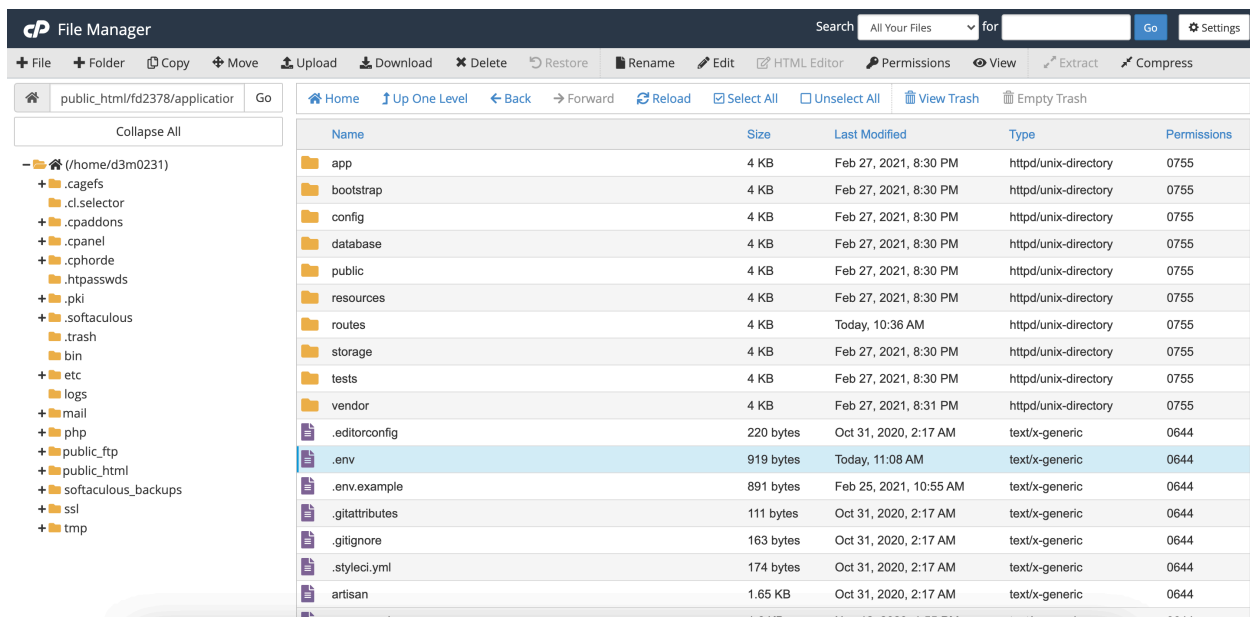

Step 18: Once the file has been extracted you will see this screen (click Close)

Step 19: Now you should see a bunch of folder (If you do not see this please hit GO button shown below)

Step 20: Open up the application folder and find the .env file

Step 21: Right-Click and edit the file

Step 22: You need to first edit line #5 with your website URL

Step 23: You need to edit line #14-16 with your database information

```
14 DB_DATABASE=d3m0231_fb1234
15 DB_USERNAME=d3m0231_fb1234
16 DB_PASSWORD=KqQHY@y]+*R1
```

Step 24: Save and close this file

Your installation is complete!

Please visit **yourdomain.com/yourfolder** or **yourdomain.com** to browse the web application.
